Coding Boot Camp

Module 03

Today's Goals

By the end of today's class you should be able to:

01 — Create an array and access elements using the index.

02 — Iterate over an array using a for loop.

03 — Write a function expression and a function declaration.

04 — Identify the difference between global and local scope.

05 — Implement array methods.

Instructor Demonstration

Arrays

Your turn - Arrays

Follow the instructions in the Readme.md file of folder:
12-Stu_Arrays

Suggested Time:

15 minutes

Instructor Demonstration

Iteration

Your turn - Iteration

Follow the instructions in the Readme.md file of folder:
[14-Stu_Iteration](#)

Suggested Time:

15 minutes

Instructor Demonstration

Functions

Your turn - Functions

Follow the instructions in the Readme.md file of folder:
16-Stu_Functions

Suggested Time:

15 minutes

15 Minute **Break**

Instructor Demonstration

Scope

Your turn - Scope

Follow the instructions in the Readme.md file of folder:
18-Stu_Scope

Suggested Time:

15 minutes

Instructor Demonstration

Methods

Your turn - Methods

Follow the instructions in the Readme.md file of folder:
20-Stu_Methods
